The exhibition *Itinerarium Romanum Serbiae* opened on Thursday, 24 September 2015, at the Montevideo Museum of Art History, hosted by the Serbian Archaeological Institute, the Ministry of Foreign Affairs of the Republic of Serbia and the Municipality of Montevideo. The exhibition was inaugurated by Prof. Dr. Miomir Korac, Director of the Serbian Archaeological Institute, who used the occasion to recall the importance that the archaeological site of Viminacium had in Serbia. The value and the high quality of the exhibition were also highlighted by the Manager of the Museum of Art History, Gustavo Ferrari, who added that this exhibition was treating a subject still not widely known in that part of Latin America.
