

"President of Montenegro Milo Djukanovic continues to upset Montenegrin citizens with lies about Serbia and its alleged state policy of Greater Serbia, accusing Serbia of interfering in Montenegro's internal affairs.

Who in Serbia is threatening Montenegro, who is disputing the state of Montenegro and its foreign policy orientation? The only thing that interests Serbia are the rights of the Serbian people and of the Serbian Orthodox Church in Montenegro. It was not Serbia but his own people that cost Milo Djukanovic the elections. It was not Vucic that told Montenegrins who to vote for, it was Rama and Haradinaj. So, this does not bother Milo Djukanovic but it bothers him if someone considers Montenegro as "a natural part of the Serb world? Does he consider Montenegro as "a natural part of Albanian world" since he does not mind the interference by Rama and Haradinaj? It was not Serbia that pursued anti-Montenegrin policy, but it was Montenegro that pursued anti-Serbian policy by interfering in the internal affairs of Serbia and by recognizing Kosovo.

"Serbia has an interest in developing the best possible relations with Montenegro, and it is time to stop misleading the Montenegrin people in order to create an alibi to stay in power," Dacic said.
